WORK EXPERIENCE

Software Developer | Webkul Software Pvt Ltd

2023 - Present

- Designed, developed, and maintained **15+ production-ready Bagisto modules** across Marketplace, SaaS, POS, GroupBuy, HyperLocal, PWA, FAQ, payment, and shipping domains.
- Built modular Laravel packages using service providers, routes, migrations, models, repositories, ACL/menu configuration, Blade views, Vue.js components, and reusable admin/frontend workflows.
- Developed **6 payment gateway integrations** including Paytm, Razorpay, Stripe, Moyasar, PayPal, and PayU with secure transaction handling, webhooks, refunds, and transaction logs.
- Implemented **4+ shipping integrations/modules** including table-rate, per-product, DHL, UPS/FedEx-style carrier flows, real-time rate APIs, shipment creation, tracking, and label-related workflows.
- Delivered **40+ client customizations** for eCommerce, marketplace, shipping, checkout, promotions, pricing, seller operations, and business-specific workflows.
- Worked on **multi-tenant SaaS architecture** with tenant-aware data separation, storefront configuration, package-driven modules, and scalable admin controls.
- Optimized REST/GraphQL APIs, MySQL queries, and Redis caching strategies, improving API response performance by around **30%** in key workflows.
- Built and enhanced Vue.js interfaces for admin panels, checkout flows, POS screens, media selection, dynamic forms, and interactive commerce workflows.
- Mentored **5 junior developers**, performed code reviews, assigned module-level tasks, supported debugging, and contributed to sprint-based delivery within a team of around 28 engineers.
- Maintained backward compatibility across Bagisto versions while improving module quality, documentation, release stability, and client delivery confidence.

PHP Developer | Agami Technologies

2022

- Developed a Bagisto-based Bullion Store eCommerce platform supporting **800+ products**, dynamic pricing, category management, and product listing workflows.
- Contributed to ERP-related business modules and implemented reusable backend/frontend features for operational workflows.
- Built dynamic Vue.js frontend components and integrated them with Laravel backend APIs.
- Optimized MongoDB queries for product listings, reporting, and data retrieval performance.
- Collaborated with the team on agile development, testing, deployment, debugging, and production support activities.

KEY PROJECTS

NewsTech - Modular Laravel News CMS

Tech: Laravel, PHP, Vue.js, Blade, Tailwind CSS, MySQL, Vite, PHPUnit, Modular Package Architecture

Building a modular Laravel-based news CMS with frontend news website, admin dashboard, article/category/tag/author management, media library, rich text editor, SEO toolkit, sitemap, RSS feeds, comments, bookmarks foundation, newsletter campaigns, advertisement manager, and reader-facing workflows. Designed with Bagisto-style package boundaries, centralized admin/frontend routes, render events, settings registry, tests, and GitHub-ready documentation.

Bagisto Marketplace & Multi-Tenant SaaS Platform

Tech: Laravel, Bagisto, MySQL, Vue.js, Redis

Built marketplace and SaaS modules with seller dashboards, commission management, vendor workflows, tenant-aware data separation, storefront management, admin controls, and reusable package-driven architecture for international eCommerce clients.

POS (Point of Sale) System

Tech: Laravel, Vue.js, MySQL, IndexedDB

Developed POS workflows with order synchronization, inventory handling, barcode support, invoice generation, customer/order history, and offline-capable transaction handling using IndexedDB and Vue.js interfaces.

Payment Gateway Suite

Tech: Laravel, PHP, REST APIs, Webhooks

Integrated multiple payment gateways as standalone Bagisto modules with secure transaction flows, webhook processing, refunds, payment status handling, admin configuration, and transaction logs.

Shipping Integration Modules

Tech: Laravel, Bagisto, REST APIs, Carrier APIs

Built shipping modules for rate calculation, shipment creation, tracking, carrier-specific request validation, shipping method configuration, and commerce operations across DHL, UPS/FedEx-style, table-rate, and per-product flows.

Bullion Store eCommerce Platform

Tech: Laravel, Bagisto, Vue.js, MongoDB

Developed a bullion and precious metals eCommerce platform with 800+ products, dynamic pricing, category management, and optimized MongoDB queries for product listing and reporting performance.
